

*Culpepper Reviv'd.*

BEING AN  
A L M A N A C K

for the Year of our  
BLESSED SAVIOURS

Incarnation 1680

And from the Creation of the World according  
unto the best of Ecclesiastical History 5620.

Being the Biflextile or Leap year.

Wherein is briefly shew'd, the general State of the Year,  
the Solar Intercourse, the Sun's rising & setting, with  
Terms and their Returns, the Sun's rising & setting, with  
Monthly Observat. & the probable alteration of the air.  
Also the certain time of any Part of the Year in any City or  
Town in England, with a description of the most emi-  
nent Roads, &c.

To which is added Rules for Physick and Husbandry with  
many other usefull Observations necessary for the com-  
pleating such a work.

Calculated and refer'd to the Meridian of the famous  
University and Town of Cambridge; where the Pole  
Arctic is elevated above the Horizon 54 1/2° but may  
serve for any other part of Great Britain.

By Nathaniel Culpepper Student in Physick,  
and the Celestial Science.

*Sapientia Dominabitur Astris.*

CAMBRIDGE,

Printed by John Hayes, Printer to the  
University, 1680.

What part the Moon governs in Man's body,  
being in any of the twelve Signs.

Twelve Signs do measure Heavens Orb most duly  
Twelve Parts in Man resemble thos of the Moon  
Head and Face

Thus Man doth bear a part of every Creature;  
Be they, or mild, or monstrous, and (By Nature.)

Of the Seven Planets and two Nodes.

♄ Saturn ♀ Sol ♀ Venus ♀ Dragons Head  
♃ Jupiter ♀ ♀ Mercury ♀ Dragons Tail.  
♂ Mars

Who knows the wondrous workings of those Seven,  
Wants not an ace of knowing O O D and Heaven

Of the Five principal Aspects.

♄ Conjunction ♀ Opposition Δ Trine.  
♄ Sextile ♄ Quartile.

The Trine and Sextile, are sure marks of Love;  
The Others various mischiefs often move.

Caeli enarrant Dei foris, & opus manuum indicat expansionem  
eorum. Phil. 19. 1.

1680.

of the Eclipses this Year 1680.

**T**Here will be but two Eclipses this Year, and both those of the Sun. The first will be celebrated March the 10 at 10 in the morning it falls in 11 degrees of Aries, and near unto the Dragons Tail; and will therefore be very great in it self, but not much of it visible in our Hemisphere, but it will be total and sufficiently conspicuous to those inhabitants which live in America, the Holy Island, the Cape of Saint Vincent's, &c.

The second Eclipse of the Sun falls at 8 at night September the 12, It falls in the beginning of Libra, but not visible to us because both the Sun and Moon are under our Horizon before the defect begins: but such as Navigate near the Port of S. Peter the Island of Paxaro, &c. it will appear a very eminent Eclipse, and to those Inhabitants to whom it is visible it will have as remarkable effects.

There can be no Full Moon Eclipse this Year, because both those of the Sun are Central, and one of them is made before the Sun's Apogee and the other after it.

Note that upon the 10 of August this Year there happens a famous Conjunction of Saturn and Mars in 19 degrees of Cancer, its portents may prove very considerable and worthy the consideration of the most curious Astronomers and Astrologers.

Printed by W. Stansfield at the Sign of the Sun in St. Dunstons Church-yard in London.

New Rev. in London by W. Stansfield.

Empepper 1680.

Of the several Quarters of the Year.

Of the Spring.

The Spring Tension begins this Year 1680 March the 9<sup>th</sup> 1 hours 40 min. afternoon, and the Figure of Heaven for the Meridian of the famous University and Town of Cambridge is as tis represented by this following Scheme.

This is no favourable position of the Heavens but very contradictory and malevolent in it self, whence it may be judged by conjectures (from the current of secondary Causes) that

that Male dispositions and Inclinations will abound amongst the Commonality in general. Many Treacherous acts will be committed: strange Animosities fomented, various Rumours continually spread abroad to promote ill designs: All things appear with a sad Aspect, and most Persons of different qualities extremely disordered: many complaints do daily arise, and those persons who are afflicted find small redress. God grant we may continue in peace amongst our selves, and not break out into a Civil or unnatural War, but rather resolve unanimously to concur together in Love and Unity, and stand upon our guard against the common enemy. If God be for us, who can be against us? There are many remarkable things may be deduced from the Scheme, and other concomitant configurations, as to the affairs of the Year; but being confined to this narrow scantling of Paper, I must therefore refer the Reader to those annual Writers who insist more largely upon this Subject of general Contingencies, where I presume he may be sufficiently informed what in all probability may be impending from the configurations of the Celestial Bodies during this Revolution.

### Of the Summer.

THE Summer season begins always when the Sun toucheth the first point of *Cancer*, making then Longest dayes and Shortest nights unto us that live on the North side of the *Equinoctial*, and this Year it begins *June* the 10 49 min. past 5 afternoon, those that have a desire may set a Figure for the time and make their conjectures if they please. This Quarter is naturally hot and dry, therefore those of a Cholerick constitution should be more subject to diseases than such Persons that are *Flegmatick*. Now eat such meats that are easily digested, and rather rise with an appetite than oppress the Stomach.

### Of Autumn.

THE *Autumnal Equinox* or Harvest Quarter begins always when the Sun toucheth the first point of *Libra*, making then the Day and Nights equal, according to all parts

of the World (except under the Poles) as much shadow as Sun shine; and this Year begins *Septemb.* the 17, at 9 min. past 9 in the morning. This season is naturally cold and dry, and therefore those of a Sanguine Complexion or constitution should enjoy their health well, and the Melancholly Man or Woman most indisposed or subject to distempers. Now you may eat what meat or fruit your appetite desires, and now 'tis good to Purge, and in your Broaths use Cordial powders, which will preserve the Body till the ensuing Spring.

*Of Winter.*

**T**he Winter Quarter, or Solstice begins always when the Sun having finished his greatest Southern Declination, makes his approach to us again; and at that time makes the greatest quantity of Shadow, and least portion of Sun shine unto us, that is makes the days shortest and the nights the longest to those Inhabitants that live on this Northern side of the *Aequator*, which this Year initiates *Decemb.* the 10, at 9 min. past 9 at night. The natural temperature of this Quarter is cold and moist, and therefore aged Phlegmatick Constitutions are most subject to distempers, and Youth and Cholerick people are best in health. In *December* Melancholly and Phlegm much abound and encrease in Humane bodies, therefore now let all persons be careful to keep their head and bodies as secure from cold as may be, and eat such Broaths or Meats that are of a hot quality.

*Some Observations relating to Husbandry and Gardening &c.*

*January.*

**N**ow cut Timber, set or sow Kernals and Bayberries, Privet and Box, but in the decrease of the Moon and when she is in good Aspect to *Jupiter* or *Venus*. Also set Quicksets, Rose trees, Peaches, Filberts and Plumbs. Remove Trees likewise if the frost be not too hard: Prune and Lopp them before the Full moon, Set and sow Beans & Pease, dung Land, &c. in the last quarter of the Moon. Gold Cure

## Calender 1680.

able to rear, Fallow Land for Wheat and Rye, trench Gardens with dung and remove Bees, you may consult Mr. Butler's Book of Bees, for your direction to order those well governed creatures. Now abstain as much as may be from Bleeding, and walk abroad as little as you can in the night.

### February.

Now you may in this Month sow and set all sorts of Beans, Pease and other Pulse, Sow Mustard-seed. Now may you also cast up Ditches, set and plant Vines, Hops, Goose-berrys and any fruit that grows upon Bushes. Prune and trim all sort of Fruit-trees, from Moss, Canker and all superfluous branches. Graff in the latter end of this Month. Sow Onions in cold stiff Land, but in all things observe the age of the Moon and her Aspects to good Planets. This Month you may safely take Pills to purge the head, but let them be such which are prepared purposely for the distempers of the head: now you may eat Honey or Confections candid with Honey which gently purge the Body. Now Baths, Stoves, and to take Potions and Blood as occasion requires is not hurtfull.

### March.

In this Month, and chiefly in the new of the Moon, you may graff Pear, Warden, or Apple trees. Make an end of sowing all manner of Pulse, and begin to sow Oats, Barley, Parsnips, Onions, Carrets, Cucumbers, Melons, and all kind of Pot-herbs, s<sup>et</sup> Artichokes and Sage, geld Lambs, let Blood also according to necessity, the Sign and weather being convenient for that purpose, take advice of the Learned Astrological Physician: for observe that those diseases which cannot be cured in the Spring season by Physick, can scarcely be cured all the Year after. Now all things that purge and sweeten the Blood are wholesom: now drink moderately lest by excessive drinking you contaminate the Blood: Drink first in a morning this Month before you eat, and beware of Salo-fish, now and in April, for it putrifies the mass of Blood and breeds Scabs and Itch in the Body.

In

In April

The Honest Country-man should sow Barly, Hemp and Flax, sowe Hops, and set and sow all kind of Garden Seeds. Now open Hives for the Bees, and let them have liberty to labour for their living. Now should the Industrious Farmer provide him of Bark for the rest of the Year, and all good Housewives will be sure to look to their Dairies, and although such as are good ones will do this naturally, yet tis good to put them in mind. This Month the Blood increases, and to bleed and bathe this Month is excellent good, also to purge the Stomach by potion or otherwise, is no less necessary, but most kind of Roots this month are not so well approved of.

In May

You may sow Barly upon all light Lands and bearing Grounds, and also Hemp and Flax, and now you may sow all manner of fine seeds for Herbs, Flowers, &c. Take Lambs from their Dams, stir Land for Wheat and Rye, leave logging of Trees, teach Hops to climb, but be sure you cut off the superfluous branches. Rise early, walk in the fields chiefly by curious Rivers and running Streams. You may now eat Sage and Bunter to breakfast: Sage and Clarified Whey together with Scurvy-grass Ale and Wormwood Beer are wholesom Drinks in a morning fasting. Now wash your face often with fair running Water, drink but little Wine this month, and sleep moderately after Dinner. You may now take Physick upon occasion to purge the Blood, and such drinks now are wholesome for the same.

In June

You may shear Sheep, bring home Fuel, weed Corn and Gardens, gather Snails, Caterpillars & Worms from amongst your Herbs and Flowers. Set Rosemary, Carnation Flowers, Gilliflowers. Sow Lettice and Radish seed, but this is the decrease of the Moon, and then you may be sure they will not run to seed. Now also make your Hay, carry Sand, Lime, Marle, and manuring of what sort soever befitting your Land, Cut neither Hedge nor Tree in this and the two next months. Beware of great thirsts, use a thin diet, moderate exercise, rise early in the morning, eat little raw Milk, Cheese or Apples, but to wash the feet often in cold water is wholesome.

*Calpeper 1680?*

*July.*

Let you may apply your self to the making and getting in of Hay, pull Hemp that is ripe, gather Garden beans, get Wormwood and Gall to strew on your floors to destroy those little Vermin of Moths and Fleas which now are apt to increase. Now fence your Coppices and lesser woods. Use your self but be moderate in it, take no Phylick now but upon violent and extraordinary occasions. Ply your Harvest that is ripe, but do all things with regard to the position of the Moon. Drink little Wine this month, and abstain from the Sports of Venus, and eat not much green fruit this month, but remember to

*Labour in Summer, take pains with the art.*

*Life in Winter live poor and in want.*

*August*

Mow close your Corn Harvest as you are encouraged by the weather. Sow your Winter herbs in the new of the Moon, gather your Garden seeds, Mow Barly and Oates at this time. Gather also your Summer fruits, refrain from sleeping in the day time after your meat; avoid also riot and excess. Temper not with Phylick in the Dog days, although you have an encouraging Proverb thereto by some Covetous Physicians which say—*Caute non Mordet in Anglia.* To eat Sage is wholesome now, and to drink moderately a glass of good and pleasant Wine is good and profitable for the Body and the preservation of health, now all Meats, or Herbs that be cold of quality are accounted wholesome.

*September.*

Now you may gather Hopps as they begin to grow brown the weather being fair and no dew on the ground: you may also kill Bees, make Verjuice, sow Wheats and Rye, remove and set all Slips of Flowers; between the two Lady days, put Swine to mast, remove Trees every new Moon, from Septem. untill February or March, but let the weather be fair and warm and the Wind South or West. This month 'tis good to purge, and to this end is very excellent the Flower of *Cassia* new drawn, for it gently purges and comforts Nature.

*In*

## Calpepper 1680.

### In October.

Sow Wheat and Rye the sooner the better, but still have regard to the Moon. Set Acorns and Nuts, gather your Winter fruit the weather being dry, and in the afternoon, but it should be in the wane of the Moon, for then they will be preserved the longer sound. Now should you cut Rose-trees if you desire to have store of Roses, but you should only do it once in two years. Refuse not any needfull Physicke to the Learned Physicians hands, use moderate exercise to revive the vital Spirits and refresh nature. Now roasted meats are very wholesom, and now you may drink new and pleasant Wine, and let Blood as occasion requires, but eat not any kind of new Fruit too liberally.

### In November.

You may sow Wheat and Rye in exceeding hot sandy ground, Cut down Timber for Ploughs, Carts, Wains or Waggones and other Implements for Husbandry. Use wholesome diet with good exercise to preserve health. Make Malt, kill Hoggs, Trench your Gardens with Dung, set Crab-tree-stocks and what other matters agree with this month. This Month 'tis good to Vomit sometimes, and sale powdered meats may be eaten without danger, but avoid Bathing, for thereby the Humours will be too much stirred up and provoke distillations from the head and consequently Dimness of sight and pains in the head and eyes.

### December.

In this Month and in the last Quarter of the Moon you should cut down Timber, uncover your Fruit-trees, set Beans and Pease of all sorts, cover all your best Flowers and Herbs from frosts and storms, with Straw or old rotten Horse dung. Look carefully to your Cattle, water and keep moist your Meadows, let Horses blood that are diseased, and keep a merry Christmas in the fear of God, and rejoyce with thy Loving Neighbours, but keep thy head and body free from cold if possible and such things as be of hot quality: and thus much  
for

for the Monthly observations belonging to the whole Year  
relating to the Laborious Husbandman and Honest Coun-  
tain for which was principally intended.

This is the First time of My appearance among  
the number of Annual Writers: And if this find

acceptance, as I have no reason to doubt the con-  
sequence, I shall hereafter endeavour to oblige the

Honest Reader with such useful novelties that may  
be as finally received as freely offered for the Public

good of My Country, and thereby oblige them to a  
general applause, I hope, as they were pleased for-  
merly to afford My Worthy Friend and Relation

Mr Nicholas Culpepper, who now rests from His  
Labours, but His Works live to His eternal Ho-

nor.

And thus I conclude this my first attempt, and  
leave the rest to your Consideration and Judgment.

This I have written with this modest  
thought, that if it should be of any use to any  
person, it might be as well to have it published  
as to be buried in the dust of oblivion.

And thus I conclude this my first attempt, and  
leave the rest to your Consideration and Judgment.

# E N I S.

In this Month, and in the latter part of the Moon you  
shall cut down Timber, uncover your fruit-trees, let Beans  
and Peas of all sorts, cover your flower-beds and Herbs  
from frost and Worms, with saw or old rotten Horie dung.  
I shall deliver to you Cattle, water and keep moist your  
Meadows for Horie and other uses, and keep a merry  
company in the feast of God and rejoice with thy Loving  
Neighbours, but keep thy heart and body free from cold  
beds and keep thyself as of hot quality: and thus much  
for
